gate $g = \sigma(\alpha z)$
$\alpha = 2$
$\alpha = 6$
$\alpha = 20$
$z = 0.25$
$g(z)$
flag logit z
gradient $\mathrm{d}g/\mathrm{d}z$
$\alpha = 6$: largest gradient at $z = 0.25$
$\alpha = 20$: saturated, no gradient
$\alpha = 2$: shallow, weak gradient
$\mathrm{d}g/\mathrm{d}z$
flag logit z
