
Aggregate contrast (all methods): causal−gradient faithfulness gap 0.321, 95% CI [0.294, 0.348] over ALL regimes (robust, excludes 0).
Position regime alone: gap 0.326, 95% CI [0.277, 0.375] (SIGNIFICANT, excludes 0).

Grad×Input
SmoothGrad
Integrated Gradients
Expected Gradients
naive gradient (sampler off) — the §1 floor = 0
bilinear sampler ON — gradient restored (nonzero), faithfulness low/mixed
per-game sampler faithfulness (all 6 games)
no names no game concept (every method, both conditions)
